## Research Colloquium: Professor Peter Goodyear Enhancing Learning with Technology

**Peter Goodyear**  
**Professor of Education,**  
University of Sydney  
Australian Laureate Fellow

**Date:** Monday 4 April 2011

**Time:** 2:30pm-4:00pm

**Location:**

William Wilkins Gallery,  
Level 7, 35 Bridge Street,  
Sydney.

**An opportunity to meet  
Peter and share afternoon  
tea follows the formal  
proceedings.**

Peter is Professor of Education and Co-Director of the Centre for Research on Computer-Supported Learning and Cognition at The University of Sydney. His research focuses on: learning technology and the learning sciences; teachers' knowledge and beliefs; technology-enhanced professional learning and educational design tools and methodologies.

As the first ever Laureate Fellow awarded in the field of Education, Peter has a significant, sustained leadership and mentoring role in building Australia's internationally competitive research capacity in learning technology and design.

Peter will discuss his research into ways of analysing and improving the increasingly complex systems in which learning takes place, especially those where computer technology plays a strong part. The focus of his work is on networked learning—where people learn through collaboration that is wholly or partially online.

This is a unique opportunity for Departmental staff to engage with a truly world class researcher in the burgeoning field of learning technology and design.

**Dr Max Smith**

Senior Manager  
Student Engagement and Program Evaluation

**Please RSVP by 30 March 2011  
or for more information contact:**

Dr Robert Stevens,  
Manager, Schooling Research  
Telephone: 9244 5619  
Email: Robert.Stevens@det.nsw.edu.au

**The Research Colloquium;**

- is held once per school term,
- provides a forum to discuss and debate education research issues,
- disseminates the findings of research to Departmental Officers so that these findings can better inform policy and practice.
